

Figure 1. ADS1198ECG-FE Kit

we used this kit to take the signal from throat of human firstly, we try to take ECG signal (Heartbeat) and we succeeded to do that

Then w try to take signal from throat by that cable

Figure 45. 15-Pin, Shielded Connector from Biometric Cables

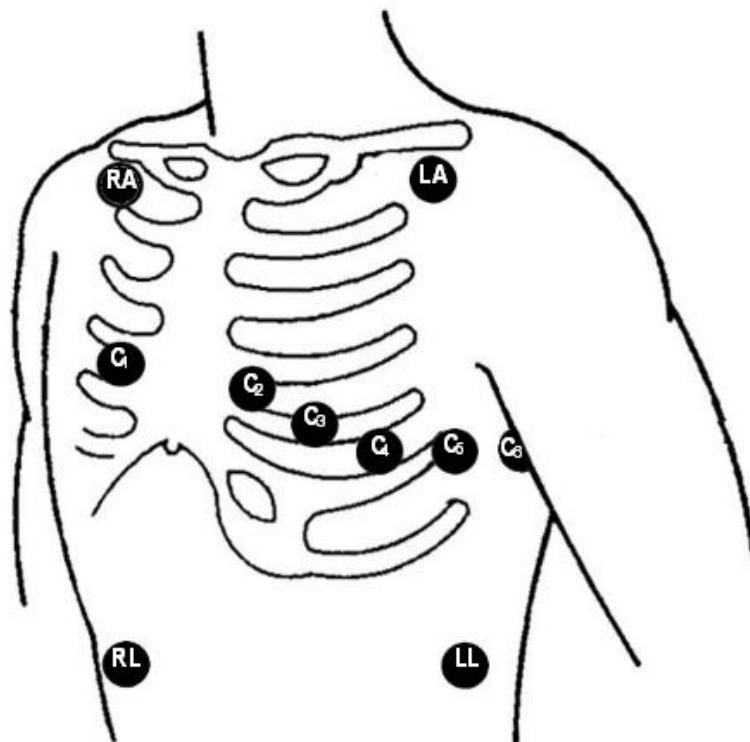

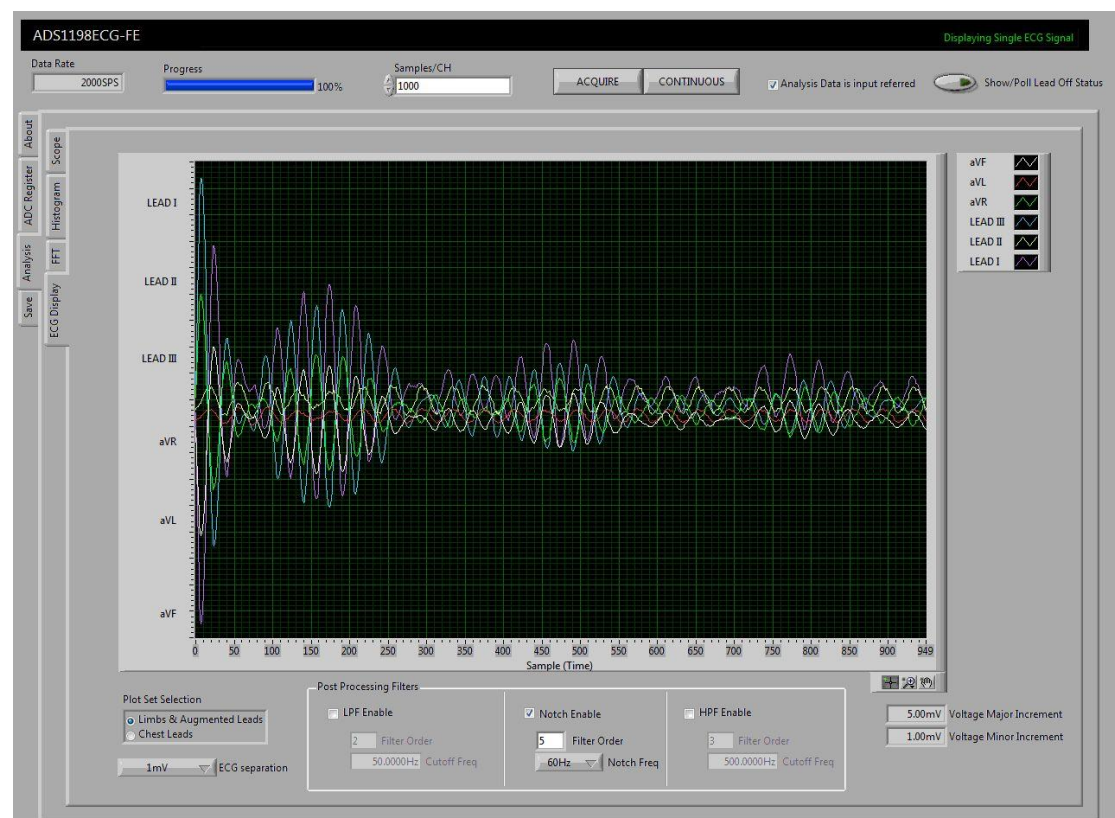

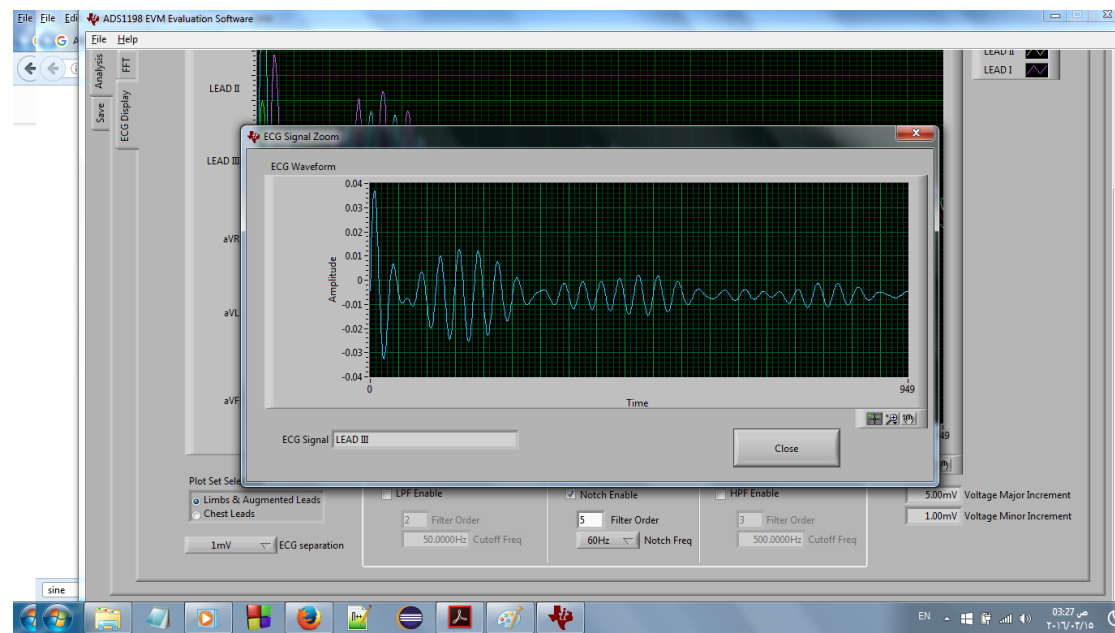

Fig. 5-1-5 Indicative map of the placement of ECG electrodes

But we can't do by that kit

Because kit was for ECG only not to EMG that we want so we excluding this kit after we discussed that with Texas site and they said that this kit can't read vocal signal
